BOOK DESCRIPTION

Fifteen years ago, Maggie let Nick walk away. She never told him what he left behind.

Maggie O'Malley Cassidy has built a life around her three children and one secret she never expected to face. Then Nicholas Kord comes home for a wedding.

One look at fifteen-year-old Jason is all it takes. Nick can do the math, and discovering he has a son Maggie never told him about unleashes fifteen years of anger, hurt, and unanswered questions. But Nick remembers how their story really ended.

Maggie may have kept Jason from him, but he gave her every reason to believe they had no future.

He can't change the years they lost. He can decide what happens next. So Nick stays. He shows up for his son, steps into the chaos of Maggie's life, and discovers the passion between them never disappeared. But claiming his place in Jason's life is one thing. Convincing Maggie to risk her heart on him again will take far more.

Nick already lost her once. This time, walking away isn’t an option.

This book was previously published with the title, Little White Lies. It has been revised and re-edited by the original author.
