Paramedic Exam (NREMT)

by **Feras Alzubi**

BOOK DESCRIPTION

The detail the new subtitle compresses, stated in full: Foundations to Advanced Life Support — the Whole Field from Zero, Plus Complete Mastery of the NREMT Paramedic Certification Examination, with Clinical Judgment, Scenario Drills & Timed Practice in the Exam's Own Shape. The apparatus, counted from the finished book: 1,360 original practice items, every one fully explained — a 50-item diagnostic with its key and domain-routing report, 680 chapter-quiz items, two full forms presenting 150 items in 3.5 hours in the exam's own disclosed shape, 180 domain repair items, 60 scenario judgment items in 12 linked clusters, and a 90-item CAT Ladder rehearsing adaptive testing; 36 chapters; 95 original figures; a 656-term glossary. Built on the Paramedic Certification Examination administered since July 1, 2024 (2019 Practice Analysis + 2021 Addendum) — six domains including Clinical Judgment; no separate NREMT psychomotor examination. One examination, in its current shape: a computer-adaptive test (CAT) of 110–150 items in 3.5 hours at Pearson VUE testing centers, with 20 unidentified pilot items,

dichotomous scoring, and domains weighted Airway, Respiration & Ventilation 8–12% · Cardiology & Resuscitation 10–14% · Trauma 6–10% · Medical / Obstetrics / Gynecology 24–28% · EMS Operations 8–12% · Clinical Judgment 34–38%. The examination fee is $175 per attempt, as NREMT publishes it. This book prepares the reader for the Certification Examination; certification is NREMT's, licensure is the state's, skills competency is the program's. Skills competency is established inside the accredited program — the psychomotor competency portfolio and the CoAEMSP Recommended Student Minimum Competency (SMC) Matrix, both verified by the Program Director — and a state may still require a psychomotor examination for state licensure, checked with the State EMS Office. This book teaches knowledge about skills and examination readiness; it does not replace any program, portfolio, SMC, clinical, or field requirement. This book is an independent study guide. It is not published by, affiliated with, endorsed by, or approved by NREMT, and NREMT did not participate in its creation. NREMT states that it does not recommend any particular examination preparation materials. Exam names and trademarks belong to their respective owners. Passing any exam also depends on the candidate's own preparation; no book can guarantee a result. 36 chapters · 328,127 words of teaching prose · 1,360 practice items · 95 figures — 52 labeled equipment

images, 26 diagrams and 17 rhythm-strip exhibits · 656-term glossary

What is inside

- The whole field from zero, then ALS depth — 36 chapters in eight parts: the profession and foundations (the body, pathophysiology, pharmacology principles, and the medication-mathematics engine, re-taught inside this cover); assessment and the clinical judgment cycle; airway, respiration and ventilation; cardiology and resuscitation under the 2025 AHA Guidelines; pharmacology in practice; medicine, obstetrics and gynecology, pediatrics and geriatrics; trauma and shock; and operations, the credential shell, scenario mastery, and exam mastery.

AI disclosure: This book's content was generated by an AI-based tool (Muse) and reviewed, fact-checked against primary sources, and prepared for publication by Feras Alzubi.
