**BOOK DESCRIPTION**

I was supposed to kill her.

One Lowtown stray with fire in her veins and a broken bottle in her fist stepped between traffickers and a child. I ended them instead. Now she's in my estate, tearing through my ledgers, exposing rot I refused to see, and looking at me like I'm the real monster.

She should fear me.

Instead she challenges my throne, my bloodline, my control. Every defiant word from her lips makes my frost magic burn hotter. I dragged her into my world to balance the scales. Now I'll burn the entire Undercity down to keep her.

She's mine. My equal. My mate.

And when the Patriarch comes for her head, I'll take his crown.

Read on for possessive dark elf warlord, defiant human queen, size difference obsession, magical mating claim, political betrayal, and a ruthless sovereign who opens his

gates for the woman who broke him. HEA guaranteed!
