BOOK DESCRIPTION

She'd won her divorce, her life, her career and, more importantly, her dignity and freedom. Alicia walked away from Oliver with her head held high. But Oliver wasn't done. He crowed about how he'd tossed away a clingy, useless wife. But for all his front, Oliver was a man under siege--Devon Harrison and Cain Russell have him in their crosshairs. That's alongside the men who gave him his break; The Funding Five have decided he's not worth it, and they want their pound of flesh.

Devon Harrison stole Oliver's designer, and Oliver wants her back. Rumours and scandal begin to plague Devon, and Alicia comes clean. She announces to the world just who her alter ego is and stuns Oliver. Hate drives him forward, and he forces Eve to support him. The world is laughing at him; his own wife had been his coveted designer and he'd not known. Oliver's ego can't cope, and he's becoming more erratic.

Alicia refuses to cower again. She won't be bullied by Oliver, and she's taking the world by storm. She has powerful

friends and a man who cares deeply for her. Alicia finally appears to have everything she wished for, but something's missing. As happy as she is, Oliver can't wait to tear her down.

Eve is furious. Her world is turning upside down, and what was once secure no longer is. Oliver has a roving eye, and Eve needs to keep him interested. She can't afford to lose the cash cow she has her hooks into. She has to take Alicia down for once and all and finally latches onto a way to do that.

Can Alicia survive the coming storm and prove her innocence? With strong friends willing to stand with her, even when public opinion is against her, Alicia might have a chance. Especially when she has an unknown hero in the background, willing to do what's necessary for her happiness.
