Heat Unscripted

by **Helen Scott, Zoey Shelby**

BOOK DESCRIPTION

Five million live viewers. Three dominant Alphas. A microphone catching every breath.

Isobel Gretan is the "Faceless Siren," the most coveted voice actress in the industry. But her career is built on a dangerous lie. She's a closeted Omega in an Alpha-dominated world, surviving on heavy suppressants and digital filters that let her pass as a Beta.

Now her body is failing. And the biggest livestream of her career is about to go live.

For twenty-four hours, she'll be sealed inside a soundproof, airtight booth with the three Alphas who rule her professional life: Bram, the stoic director who controls the story. Tuck, the rugged action star who commands every room. And Cillian, the genius audio engineer who has been quietly protecting her for years.

Then the ventilation fails.

Her suppressants give out. Her intoxicating Omega scent

floods the booth, and her real voice, the one she's spent a decade hiding, triggers live on air. The doors are locked. The internet is melting down. The script just went out the window.

And five million people are still listening.
