Galaxy Circus Act One

by **Lexie Winston**

BOOK DESCRIPTION

Galaxy Circus Act One is the first omnibus collection for the Galaxy Circus. It contains Apprentice, Stagehand, and Whisperer, as well as new bonus content that has never been published before. Over 20K in new words from other points of view.

Apprentice

Lila is nobody special. She didn't have a bad childhood growing up in foster homes, there was just nothing particularly

good about it either. You could say Lila is a little lost. Her job is boring and repetitive, she only has one friend, and there is no significant partner in her life. In fact, her romance novels and her BOB is the most action she's seen in ages.

Until now.

Lila just received a letter from a lawyer informing her of a surprise inheritance, and when she agrees to the terms of

the will, Lila's life becomes out of this world. Her romance novels don't seem so far-fetched now, and you could say she's in for the ride of her life.

Apprentice is the first novel in the Galaxy Circus series. It is a reverse Harem novel, and some situations may not be suitable for people under 18.

Stagehand

If you had asked me two years ago where I would be, living on a spaceship on the dark side of the moon, learning how to run an alien circus was not in the top one hundred. It wasn't even in the top one million.

If you had told me that this was going to happen and that I was going to be living with a whole plethora of sexy aliens and getting to know my three paternal grandfathers, I would have asked what weed you were smoking, and where I could get some from.

If you had said that my stash of tentacle porn erotic novels may be a good precursor for my future sex life, I would have asked you which loony bin you had escaped from.

Yet here I am, and all of the above has occurred. Now I think I'm either committed to a looney bin and suffering a psychotic break myself, or my life really is out of this world.

Whisperer

Blood, sex, and magic… Isn’t there a song that goes something like that? Or is that just what a typical afternoon spent with a Vilaxian is like?

Throw in a loving mate that just so happens to have tentacles, a doctor with mad sex skills, and a warlock hell bent on protecting me, and you have “Life with Lila.”

And it is just going to get crazier. Alien detainees, Celestian healers, and a mate challenge are only a few of the things I have to face as I navigate my new life in the Galaxy Circus.

One thing's for sure, my life is never boring.
