BOOK DESCRIPTION

About this book. Supply Chain Management from Zero to Professional Mastery — Forecasting, Network Design, Sourcing, Inventory, Logistics, Relationships, and Risk · Diagnostic, Chapter Quizzes, Calculation and Case Sets, and Two Full 150-Item Timed Forms — that full scope is what this book teaches and reviews. Apparatus, stated exactly: 1,010 items — 50 diagnostic + 440 chapter quizzes + 100 designated calculation and case sets + 300 in the two full timed Forms A/B (150 each) + 120 repair items. Every practice answer is explained. The book's new subtitle states the selling summary: “The Complete Supply Chain Course — 1,010 Practice Questions, Diagnostic & 2 Full Timed Practice Tests, Every Answer Explained”

1,010 original practice items, every one keyed with every option explained · Two full 150-item timed forms · 38 labelled figures — 20 drawings of equipment, machines, vehicles & documents, 18 diagrams · 609-entry glossary

ECM Version 5.0 Edition — built on the published outline

structure of the APICS CSCP Exam Content Manual (ECM), Version 5.0, the current edition (re-verified 5 November 2026). This book is an independent study guide for the APICS Certified Supply Chain Professional (CSCP) examination of the Association for Supply Chain Management (ASCM). It is not published by, affiliated with, endorsed by, or approved by ASCM or APICS, and neither participated in its creation. "ASCM," "APICS," "CSCP," and "Certified Supply Chain Professional" are used nominatively only, to name the credential, the examination, and the organizations this book teaches. This book makes no promise of passing, of any score, of certification, of a job, or of income. It prepares for the examination only; the credential itself is granted by ASCM when every requirement is met. The examination, as ASCM publishes it: one exam of 150 questions in 3.5 hours — 130 scored and 20 unidentified pretest questions, indistinguishable in the sitting — four options per question, scored on a scaled range of 200–350 with the passing standard at 300. The raw number correct behind a 300 varies by form; a scaled score is not a percentage, and no score in this book is ever converted to a scaled score or a pass prediction. The eight modules carry ECM Version 5.0's published weights: Supply Chains, Demand Management, and Forecasting 10% · Global Supply Chain Networks 10% · Sourcing Products and Services 17% · Internal Operations and Inventory 19% ·

Forward and Reverse Logistics 9% · Supply Chain Relationships 17% · Supply Chain Risk 10% · Optimization, Sustainability, and Technology 8%. Eligibility is open — ASCM removed the former eligibility gate effective December 2, 2022 — an Authorization to Test runs six months (twelve months in a bundle), a retake follows a required 14-day wait, the credential is maintained with 75 professional development points every five years (100 for Fellows), and ASCM's published study guidance is an average of about 100 hours per certification exam. Examination fees are ASCM's to publish and change; this book states no exam, bundle, or retake fee figure and routes you to ASCM's own store for current pricing. The book was re-verified against ASCM's own published pages at production on 5 November 2026, with no material change found. The framework is taught by structure, principle, and method in this book's own words — no Exam Content Manual, Learning System, or dictionary text is reproduced — and every case, company, and vignette in the book is invented with its own stated values.

AI disclosure: This book's content was generated by an AI-based tool (Muse) and reviewed, fact-checked against primary sources, and prepared for publication by Feras Alzubi.
