BOOK DESCRIPTION

She saw something she wasn't supposed to.

Now she has twelve nights to survive the mountain… and the man sworn to protect her.

Wildlife photographer Winter Calloway came to Ironwood Falls to document wolverines and Christmas cheer—not to witness illegal logging in a protected forest. When armed men start hunting her for the evidence she captured, there's only one place to hide.

A remote fire lookout. One bed. Zero escape.

Cade Hartley is a former smokejumper and search-and-rescue specialist who hasn't felt alive since losing his wife three months ago. He took a temporary security assignment to outrun his grief—not to fall for the fearless woman who crashes straight through his defenses.

Snowed in. Cut off. Hunted.

Twelve nights of Christmas in a fire lookout where danger presses in from all sides—and attraction burns hotter than

the storm outside.

Winter refuses to be helpless. Cade refuses to let her be taken. And every night they survive together chips away at the walls he built around his heart.

But when the men hunting her return...

Cade will have to choose between staying broken—or fighting for a future he never thought he deserved.

Twelve Nights of Axe-Mas delivers a spicy, emotional instalove romance featuring a grieving silver-fox protector, a competent heroine who won't back down, forced proximity, snowed-in tension, and a guaranteed HEA.

Standalone. High heat. One bed. Christmas danger. Mountain man obsession guaranteed. □□□
