BOOK DESCRIPTION

Your first car should be a win, not a lemon.

Buying a used car can feel scary when you are new to it. This lively rhyming guide walks teens and new drivers (and the parents riding shotgun) through every step, from setting a budget to driving home with the keys.

In twelve short, illustrated chapters you will learn how to:

• Plan your budget and find the money

• Know where good cars are listed, and where they hide

• Do a walk-around and peek under the hood without fear

• Run a smart test drive and check the VIN

• Bring a mechanic friend for a pre-purchase inspection

• Haggle politely and handle the paperwork

• Spot red flags and scams before they cost you

Each chapter pairs a fun verse with clear, plain-language tips. At the back, a printable Car Check Card and a friendly

glossary turn the lessons into a checklist you can take to the lot.

Funny enough to read aloud, practical enough to use. A great gift for a new driver, and a handy refresher for anyone shopping for a used car.
