One thing Denver Banks didn’t count on when he joined

Firehouse 99 was that he'd find himself in a whole world of trouble with his best friend's little sister…

Denver

I had no clue when I ran into her again that we'd be a thing; the cute bartender Adelaide Wilder.

The beautiful, curvy woman I spent the night with.

My best friend's little sister.

There was just one rule: look after her in the Windy City, oh, and keep your hands to yourself…

Rule one broken, which is just my luck.

I of all people should know: Where there's smoke, there's fire, and Adelaide burns deep within my soul even when I know I should extinguish the embers. I just can't seem to do it.

I swore I'd keep her safe, just like I did all those years ago. Even when my future with her is threatened, she's the only woman who holds the key to the inferno blazing inside my heart…

But have I left it too late? Will we rise from the ashes, or will our love be lost forever?

A plus-size heroine, grumpy/sunshine, brother's best friend, feisty FMC romance with high heat.

This book is part of the Firehouse 99 shared world but each book can be read as a standalone. For fans of protective alpha heroes with all the feels.
