Fall is Brewing

BOOK DESCRIPTION

In Orchard Falls, autumn means three things:

changing leaves, strong cider… and grudges that refuse to die.

I run one of the town's rival apple orchards—legacy trees, time-honored recipes, and a cider the locals swear by.

He runs the other—modern techniques, experimental brews, and a smile that makes me want to throw an apple at his head.

So when a heated argument at the Harvest Festival turns into a very public bet, the rules are simple:

Whoever loses has to work at the winner's orchard.

No sabotaging.

No backing out.

And absolutely no falling in love.

But as late-night tastings turn into stolen glances, and crisp

autumn mornings blur into something warmer, I start to wonder if the real danger isn't losing the competition...

...it's losing my heart to the one person I never saw coming.

Because fall isn't just in the air.

Fall is brewing.
